Relational DB SQL	**Non Relational DB** MongoDB		

Tools

Design Adobe Photoshop	**UI - UX** Figma	**UI - UX** Framer	**UI - UX** Adobe Xd

Experience

Member of Technical Staff
42 Gears Mobility Systems | Jul 2021 - Present

During my tenure at 42 Gears, I gained extensive experience working as part of IoT and Linux teams, where I primarily worked with Java, C#, and Angular. Additionally, I gained hands-on experience working with several AWS services including EC2 and S3, as well as Google Cloud's Firebase, Pub/Sub, and Firestore. I also worked extensively with MQTT, Kafka, and WebSocket communication protocols. I have worked on various micro services and helped developing new features for the products.

I worked initially with Linux team in developing a new feature to support application management in Linux devices and then I worked with IoT team in developing connectors for things devices. Simultaneously, I have developed and fixed multiple features and APIs.

Consultant Software Developer
SRKs Veda Solutions | Apr 2019 - Jul 2021

As a Consultant Software Developer at SRKs Veda Solutions, I played a key role in developing an e-learning application for both web and Android platforms. The application was successfully sold to a company after completion. Additionally, I contributed to the development of several websites and small-scale web applications, showcasing my expertise in web development.

Along with software development, I created numerous graphic designs for the company's social media marketing clients, including logos, and collaborated closely with the product management team in BRD and PRD developments too and got an oportunity to lead a small team with 3-4 members.

Recent Personal Projects

Website Development | Kezan India Pvt. Ltd. | 2022
www.kezanconsulting.com

As a freelance developer, I built a website for a consulting firm called Kezan. I worked closely with the client to follow their wireframes and mockups and developed a simple static website. To enhance user experience, I added a mailer feature with the ability to attach files using Node mailer. I hosted the website on Vercel and completed the entire development project in just 8 weeks, working on weekends while balancing a full-time job on weekdays.

Freelance Web Developer | Grainscape | 2021
www.grainscape.in

I developed a comprehensive e-commerce website for Grainscape, an organic product delivery service provider. The website was built using Next JS, Node and Express, and featured inventory management capabilities for tracking orders, shipments and refunds. I deployed the website on EC2 and utilized Mongo DB as the database. The entire development process took around 3 months for the initial deployment.
